

"Imagine you are shopping for sneakers. Below are two sneakers from a collection that is always available for purchase."

1. Personal Style & Purchase Intent

 Which sneaker are you more likely to purchase?

- ☐ Sneaker A (Regular Release)
- ☐ Sneaker B (Limited Edition Release)
- ☐ No preference

 Purpose: Measures baseline purchase intent in the absence of exclusivity cues.

2. Material & Pricing Preferences

 Which sneaker would you pay 20% more for if made with premium materials?

- ☐ Sneaker A (Regular Release)
- ☐ Sneaker B (Limited Edition Release)
- ☐ I wouldn't pay more

 Purpose: Tests price sensitivity without scarcity priming.

3. Past Shopping Behavior

 Which sneaker would you be more likely to pre-order or wait in line for?

- ☐ Sneaker A (Regular Release)
- ☐ Sneaker B (Limited Edition Release)
- ☐ I wouldn't wait in line for sneakers

 Purpose: Measures past engagement in sneaker culture.

4. General Availability & Influence on Interest

 If you knew one of these sneakers was always available while the other had limited stock temporarily, which would you prefer?

- ☐ Sneaker A (Regular Release)

- ☐ Sneaker B (Limited Edition Release)
- ☐ No preference

 Purpose: Captures the psychological effect of always-available products.

5. Willingness to Pay (WTP)

 If both sneakers were priced differently, which one would you buy at the following price points?

- ☐ Sneaker A (Regular Release) for \$100-\$200
- ☐ Sneaker B (Limited Edition Release) for \$200-\$300
- ☐ I wouldn't buy either

 Purpose: Establishes the Control Group's pricing expectations.

6. Resale & Speculative Behavior

 If both sneakers increased in value, which one would you be more likely to resell?

- ☐ Sneaker A (Regular Release)
- ☐ Sneaker B (Limited Edition Release)
- ☐ I wouldn't resell sneakers

 Purpose: Measures speculative purchasing behavior without explicit scarcity cues.

7. Preference When Given a Choice

 If you had to choose between these sneakers at the same price, which would you pick?

- ☐ Sneaker A (Regular Release)
- ☐ Sneaker B (Limited Edition Release)
- ☐ No preference

 Purpose: Tests if people still show preference differences despite identical labeling.
